

## NORTEL AND QUINTUM DEPLOY VOIP IN ARIZONA SCHOOL DISTRICT

Deer Valley Unified School District (DVUSD) in Phoenix, Arizona, deployed Nortel's Communication Server 1000, along with Tenor VoIP switches from Quintum Technologies, allowing them to take advantage of Voice over IP service with their traditional phone system.

DVUSD, which covers nearly 400 square miles and encompasses 37 schools, deployed Nortel's CS 1000 to provide IP phone support throughout the entire district. **Quintum Tenor switches, which have earned the Nortel Compatible Product designation through interoperability testing with Nortel's CS 1000,** provide branch office

support for legacy analog systems and local connectivity to the public telephone network. Tenor VoIP switches were deployed in all remote locations to support fax machines, analog phones, and modem-based devices, such as postage meters requiring funds transactions by modem, security alarm systems access, and control of irrigation timing and support systems. All these analog devices and services continue to be supported on the new Voice over IP network. All told, DVUSD deployed 33 Tenors in two weeks, without any complication.
