

**VOIP Calls Centralized Recording [www.grabavoip.com](http://www.grabavoip.com)**

*"90 day free trial of our Grab@voip services when using Chance Telecom's long distance services with a Quintum Tenor CPE"*

Chance Telecom and Quintum are adding more value to its relationship with its Call Center and Telemarketing customers by offering a new "State of the Art" recording feature for terminating calls via our [www.chance2call.com](http://www.chance2call.com) and [www.chance4minutes.com](http://www.chance4minutes.com) platforms. This offer is exclusively for Quintum Tenor owners.

Developed to work seamlessly with Quintum Tenors, the service records some or all calls originated by customers and terminated through our network, or calls being terminated at customer premises that come from toll-free numbers in the USA and International destinations. Grab@voip is perfect for Customer Service or general access to International Offices. Our service will work flawlessly with Quintum's analog or digital Tenor VoIP equipment.

The call recording is real time and all audio files are accessible immediately via our website ([www.grabavoip.com](http://www.grabavoip.com)) for online listening and downloading on MP3 format. Customers can enjoy up to 40 gigabytes of space to store recorded calls and are able to manage and schedule their call downloading and deletion via FTP.
